A MODERN PIECE OF **FURNITURE TURNED** *Artwork*

River Tables are a popular, modern piece of furniture turned artwork. River Tables are made using wood and epoxy resins. This provides a stunning contrast between the natural beauty of the wood, and the modern colourful finish of Metallic Epoxy.

Recommended Products

EPO100C® Clear Epoxy Resin – Experienced Users Only

90-minute cure with a 90°C Peak Exotherm in a 150ml cup. Relatively quick curing, good for multiple small pours.

EPO100SCC® Slow Cure Clear Epoxy Resin

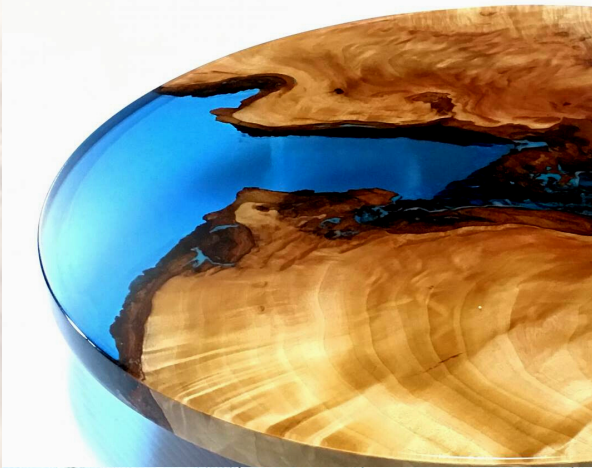

180-minute cure with a 70°C Peak Exotherm in a 150ml cup. This is recommended over EPO100C®, as it cures slower, at a lower temperature. This lowers the chances of cracking and allows for deeper pours.

350M Metallic Epoxy Tint

3% Metallic Tint will achieve a solid colour, by using less tint you will achieve a translucent colour. For patterns, wavy designs and other abstract designs. This tint increases the speed of curing and is recommended to be used with EPO100SSC® Super Slow Cure Clear Epoxy Resin.

350E Epoxy Tint

10% Epoxy Tint will achieve a solid colour, by using less tint you will achieve a translucent colour. For single colour rivers, or mixing with Metallic Epoxy Tints for marble effects.
